

# TARA GROVES

CLASS OF 2008

"The Catholic education I obtained through St. Mary of the Woods and Trinity High School is something I will always carry near and dear to my heart. I graduated from Trinity High School in 2008. I went on to attend Murray State University, where I completed the Animal Health Technology Program, and graduated with a Bachelor of Science in Agriculture degree. After college, I became a licensed veterinary technologist and practiced at Kentuckiana Animal Clinic in Owensboro, Kentucky. While practicing at KAC, I became passionate about teaching like-minded individuals about the veterinary industry. In 2017, I started working at Owensboro Community and Technical College as an instructor for the Veterinary Technology Program, where I continue to spread my passion and love for veterinary medicine. The love and support I received at Trinity High School is unsurpassed; it was because of what I learned and found at SMWS and THS that I was confident enough to follow my dream of becoming a veterinary technologist and teacher."
