

TERRA WARD KNIGHT

CLASS OF 1998

"I am a lifelong member of St. Mary of the Woods parish, and a product of both St. Mary of the Woods School and Trinity High School. After graduating from Trinity High School in 1998, I earned my bachelor's degree in Business Administration from Kentucky Wesleyan College. I then went on to earn my Juris Doctorate from the University of Louisville, Brandeis School of Law, being sworn in as an attorney in 2005 and practicing law in Owensboro since that time. I am currently a Partner in the law firm of Thacker, Hodskins & Knight, LLP. The legal profession is a service profession. Attorneys work to serve their clients, whether its guiding them through an exciting new venture or helping them navigate through some of life's most difficult situations. The importance of service to others is certainly a lesson that was emphasized during my time as a student at Trinity High School. We are all called by God to serve in some way, including giving of our time, talent, and treasure. So many people gave of themselves to help me achieve my goals during my time at Trinity and beyond. That commitment and sacrifice of others has had a profound impact on me and my desire to serve others, not only through my career choice, but also by staying involved in the school, parish and surrounding community. During my time at Trinity, the faculty and staff challenged me to strive to become a servant leader. Today, Trinity High School continues to strive to develop servant leaders through the education and values it instills within its students. This is something I witness today on a regular basis in my career and community involvement. Business and community leaders not only compliment Trinity students and graduates on their solid work ethic and servant leader qualities, but also seek them out as valued members of their own organizations. I am proud to be a Trinity alum and am proud to now see my own children in these schools, learning the importance of service to others and developing into servant leaders for the next generation."
